CHINONSO MICHAEL MMUOMA

FULL-STACK DEVELOPER (PHP, LARAVEL, FLUTTER) | ECOMMERCE OPERATIONS & AUTOMATION

Email: office@thebezalel.com | Location: Aba, Nigeria (remote)
Portfolio: https://thebezalel.com | LinkedIn: https://www.linkedin.com/in/mmuoma-chinonso

PROFESSIONAL SUMMARY

Full-stack developer based in Nigeria and working remotely, with professional experience dating back to 2008. Builds web applications, database-driven portals, Flutter mobile apps, REST API integrations and payment features in PHP, Laravel, MySQL, JavaScript and Dart, deployed and maintained on Linux and Docker. Brings six years of remote eCommerce operations with a US-based team (Amazon listings and FBA, A+ content, Magento catalog management, inventory data and reporting in monday.com and Jira), so understands both the code and the business process it has to support. Open to remote full-time, contract and freelance roles in software development, SaaS and eCommerce automation.

CORE TECHNICAL & BUSINESS SKILLS

Software Development: PHP, JavaScript, Dart, HTML5, CSS3, SQL

Frameworks & Platforms: Laravel, Flutter, React, Node.js, Bootstrap

Backend & Data: REST APIs, MySQL, database design, authentication, role-based access, Payment Gateway Integration, integrations

Mobile & Deployment: Flutter/Android, Linux, VPS hosting, application deployment, troubleshooting

eCommerce Operations: Shopify, WooCommerce, Magento, Amazon, eBay, Etsy, Walmart Marketplace; product listings, catalog data, inventory workflows

Automation & Productivity: Excel, Google Sheets, VBA, Google Apps Script, data cleaning and reporting

Tools: Git/GitHub workflows (profile not supplied), Docker, LiveKit/WebRTC

PROFESSIONAL EXPERIENCE

Independent Software Developer & eCommerce Automation Specialist

Freelance | 2008–Present

- Develop and maintain websites, database-driven applications, administrative portals, and business tools using PHP, MySQL, JavaScript, and related technologies.
- Build backend functionality, REST API integrations, authentication workflows, role-based access, reporting interfaces, and payment-related features.
- Develop and maintain Flutter-based Android applications and support deployment, updates, and technical troubleshooting.
- Configure and maintain application hosting environments, Linux servers, and production deployments.
- Support eCommerce workflows including product research, listing creation and updates, catalog maintenance, inventory data, and marketplace administration.
- Use spreadsheets and scripting approaches to organize data, reduce repetitive manual work, and improve process consistency.

Deep Deals LP (US-based, remote) | Senior Administrative Assistant (Freelance) | Jan 2012 – Present

- Remote administrative support for a US-based eCommerce business.
- Built and maintained company websites and product pages.
- Processed and tracked customer orders from receipt through fulfilment.
- Managed inventory records, stock levels and product data across sales channels.

TOTALPACK (Nicolas Ivulic) | Remote eCommerce Operations & Data Specialist | Sep 2019 – Nov 2025

- Managed Amazon marketplace operations: product listings, ASIN updates, titles, pricing, images, A+ content, FBA conversions, and inventory quantities.
- Created and maintained products and catalog data in the company Magento web store, including cross-checking the store against the product catalog.

- Processed and tracked custom-printed tape orders through the ticketing system, coordinating signed customer approvals.
- Managed the company Google Business Profile and supported social media post scheduling.
- Handled data entry, cost-control spreadsheets, and forecasting/profit-tool updates, working day to day in monday.com and Jira with a US-based team.

TheBezalel Technologies | Founder & Lead Developer | Nov 2010 – Sep 2022

- Founded and led an IT services studio building client websites, database-driven portals, mobile apps and SaaS products (thebezalel.com).

SELECTED PROJECT EXPERIENCE

Watchman Campus Fellowship Management Platforms

Technologies: PHP, MySQL, Flutter, REST APIs, payment integrations

- Contributed to web portals and mobile applications supporting member services, administrative workflows, financial operations, and event management.
- Worked on role-based access, data management, reporting, payment-related functionality, deployment, and application maintenance.

Real-Time Video Streaming and Production Platform

Technologies: Laravel, LiveKit, WebRTC, Docker, Linux

- Worked on infrastructure and application workflows for multi-camera video contribution and browser-based monitoring.
- Configured and troubleshot deployment components, reverse proxying, containerized services, and integrations with external streaming destinations.

LOGISS School Admission and Portal Systems

Technologies: PHP, MySQL, HTML, CSS, JavaScript

- Worked on school portal features for admissions, student records, and registration workflows.
- Troubleshot session-specific admission-number generation and database-driven administrative processes.

Gatherly — Event Ticketing & Fundraising App

Technologies: Laravel, payment integrations (Paystack, Stripe, PayPal) | gatherly.thebezalel.com

- Built an event ticketing and fundraising app with payment integration through Paystack, Stripe and PayPal.

eCommerce and Business Automation Solutions

Technologies: PHP, MySQL, JavaScript, Excel, Google Sheets, APIs

- Applied software and spreadsheet workflows to product data organization, catalog updates, operational records, and reporting.
- Planned and implemented approaches to make repetitive business processes more consistent and manageable.

EDUCATION

B.Eng, Automobile Engineering | Federal University of Technology, Owerri | 2002 – 2008
